

Ovsyannikova Alla, was born 18.05.1985 (30 years). I finished Novosibirsk Medical University, Russia in 2008 year with honors. I had two certificates of specialists: internal medicine and endocrinologist. I am PhD since 2013 year (dissertation work was "Diabetes mellitus in young people: some clinical and molecular genetic aspects ").

Now I am working endocrinologist and scientist in Federal State Budget Institution "Scientific - Research Institute of Therapy and Preventive Medicine". My research work is about monogenic types of diabetes mellitus (especially MODY diabetes) in young patients. I investigate characteristics of the clinical course, treatment and genetic features in Siberian and Russian population. This researcher work was supported by 3 grants and 2 award.

I published more than ten abstracts in national refereed journals, 12 abstracts in conference with international participation. I have participated in international conferences: 6 oral presentations and 5 posters.
