

Sophie Chrysostomou is an associate professor, teaching stream, in mathematics at the University of Toronto Scarborough. She joined UTSC in 1989. Her passion and interest in mathematics has mutated over the years to include a passion of inspiring her students (and not only!) to study and to excel in mathematics. For this reason, she is involved in outreach activities to motivate young students to be active in mathematics. She is a regional Representative of the Canadian Math Kangaroo Contest, an annual math contest for grades 1-12 and also an organizer of the “Math in Motion... Girls in Gear!” conference, aimed to encourage grade 9 girls with math abilities to consider studies in related mathematical fields. Sophie also enjoys traveling, board games, musicals, hiking, snorkeling and long walks at the beach.
