

Dr. Violeta Oro was born in 1965 in Belgrade, Serbia. She received her B.Sc. degree (Plant Protection) from the Agriculture Faculty Belgrade, Serbia, 1993 and M.Sc. (Nematology) from the same Faculty, 2001. In 2004, she finished courses at the Stockholm's University: Flora, Fauna, Ecology and Zoophysiology and also finished Introductory Course in Nematology, Taxonomy of some Plant Parasitic Nematodes and Advanced Taxonomy of Plant Parasitic Nematodes at the Wageningen University and Research Centre (Department of Nematology), The Netherlands, 2008. During Ph.D., she worked on "Potato cyst nematodes-morphology, molecular characterization and antagonists" and received Ph.D. degree in Nematology, Faculty of Biofarming, Backa Topola, Serbia, 2011. Dr. Oro currently works as Head of the Nematology Laboratory of the Institute of Plant Protection and Environment, in which she was appointed by the Ministry of Agriculture, Fisheries and Water Management as the official investigator for work with plant parasitic nematodes. She has written more than 60 research papers and reviews in reputed national (Genetika, Archives of Biological Sciences) and international journals (Plant Disease, European Journal of Plant Pathology etc.). Violeta has presented her researches in Bulgaria, Austria, Turkey, Russia and South Africa. She has chaired a scientific session on Molecular Nematology along with Dr. Sergei Subbotin during 10th International Nematological Symposium held at Golistsyno-Bolshie Vyazemy, Moscow region, Russia, during 01-05th July, 2013. Dr. Violeta Oro is guiding two Ph.D. students and participates in two national projects. She speaks English and Swedish and uses Russian and Spanish languages.
