

Fouad A Mohammad
BSc MSc PhD Civil Eng MSc Structural Design PGCHE
Senior Lecturer
School of Architecture Design and the Built Environment
Nottingham Trent University
Nottingham, UK

Dr Fouad holds BSc Civil Engineering from Baghdad University, Baghdad, Iraq; MSc Civil Engineering (majoring in structures) from Baghdad University, Baghdad, Iraq; MSc Structural Design from Kingston University, Kingston Upon Thames, UK; PhD Civil/Structural Engineering from Liverpool John Moores University, Liverpool, UK; Postgraduate Certificate in Higher Education (PGCHE) from Nottingham Trent University, Nottingham, UK.

Dr Fouad is a senior lecturer in Structural Analysis and Design in the School of Architecture Design and the Built Environment at Nottingham Trent University, Nottingham, UK. He teaches structural analysis for all levels of the undergraduate Civil Engineering Programme, and structural appraisal and defects diagnosis of buildings for the BSc Building Surveying programme. He teaches advanced structural analysis, advanced strength of materials and contemporary themes in structural engineering for the postgraduate Civil Engineering Programme. He supervises the research projects of BSc, MSc and PhD Civil Engineering students.

His main areas of research interest include Design Optimisation of Structural Systems, Experimental Work on Reinforced Concrete Elements and Finite Element Method Application in Civil and Structural Engineering Projects. In these fields, he has authored or co-authored more than 60 publications including peer-reviewed papers in reputable journals, conference papers, technical reports for external bodies and book chapters.

Fouad is a reviewer for several structural engineering textbooks and journal papers as requested by international publishers. He is invited lecturer to deliver seminars on Eurocode and other related structural engineering topics at some universities in the Middle East. He acts as external examiner for PhD students and postgraduate courses at national and international universities. He is a member of international editors of the Journal of Engineering and Sustainable Development (JESD) and a member of editorial team of The Scientific Journal of Koya University (ARO).
