

I was born in the city of Abeokuta, Ogun State in Nigeria, in West Africa on the 24<sup>th</sup> of November, 1979. I got a B.Sc. degree in Mathematical Science (with bias in Mathematics) in 2002, M.Sc. degree in Mathematics in 2005 and Ph.D. degree in Mathematics in 2009 at the University of Agriculture, Abeokuta, Nigeria (now Federal University of Agriculture, Abeokuta, Nigeria). My M.Sc. and Ph.D. thesis were based on the notions of "Central Loops" and "Osborn Loops" in the field of Algebra known as "Theory of Quasigroups and Loops". I have been doing research in the field of "Theory of Quasigroups and Loops" for the past 10 years and I have not less than 40 research articles published in international and reputable journals. After my graduate studies at the University of Agriculture, Abeokuta, I got an appointment at the Department of Mathematics, Faculty of Science, Obafemi Awolowo University (OAU), Ile-Ife, Nigeria as an Assistant Lecturer and I have since risen to the position of a Senior Lecturer. Since my assumption of duty at OAU, I have been teaching Algebra courses at undergraduate and post graduate levels, I have completed the supervision of one M.Sc. Mathematics thesis (in Algebra) with two others in the pipeline. I am presently supervising a Ph.D. Mathematics thesis (in Algebra). I have served as a member of some academic and administrative committees both in the Department, Faculty and the University. I have attended national and International Conferences and Schools both home and abroad. I have served as a referee for some international journals, both home and abroad. I am a reviewer for both Zentralblatt MATH (zbMATH) Berlin of Germany and Mathematical Reviews (MathSciNet). My area of research in a broader sense is Non-Associative Algebraic Systems(Quasigroups and Loops) and their Applications to Cryptography and Coding Theory.
