

János Kurdics Phd

I finished high school in my hometown Tiszaföldvár, Hungary in 1984, was admitted to university, and graduated in 1989. I was employed by Department of Mathematics of Nyíregyháza College in 1990 as a lecturer. Under supervision of Árpád Szász, doctor of math.sci. of *Debrecen University*, I defended my thesis *Connected and well-chained relator spaces* in 1992 for the degree of *university doctor*. Jenő Deák, candidate of math.sci., of *Rényi Research Institute of Mathematics and György Szabó, candidate of math.sci., of Debrecen University* were the opponents (certificate no 1288-IV59/1991). The main results include characterizations of those two notions in generalized uniform spaces. Due to the change in the scientific degree system, in 1993 Professor Béla Bódi, university professor of *Debrecen University*, doctor of math.sci., established the subprogramme *Group rings and applications* in the new PhD school, to where I was admitted. After the successful final exam I defended my thesis *Lie properties of the group algebra and the structure of its group of units* in 1997. Béla Csákány, doctor of math.sci. of *Szeged University* and és László Márki, doctor of math.sci. of *Rényi Research Institute of Mathematics* were the opponents. In this way I was awarded the degree *Doctor of Philosophy* (certificate no. 8/1997.PhD.) summa cum laude. The minister appointed me the title of *college professor* in 1999. The first years of the new millennium brought many changes in the higher education system, introducing the Bologna process and BSc-MSc degrees, and I was mainly concerned with teaching, Recently I began group theoretical examinations on automorphisms of p-groups, and also joined Professor dr. habil. Czesław Baginski of *Byalistok Technical University* (Poland) in his work on the isomorphism problem. I contributed talks at several international conferences. I am the editor of *AMAP Nyiregyhasiensis*, an electronic journal included in EMS site. I am the member of the Commons of the *Hungarian Academy of Sciences*, the *János von Neumann Society of Information Technology*. I have been the reviewer of *Zentralblatt* (Karlsruhe) since 1996. I was the supervisor of more than 40 diploma works at BSc level.
