

Dr. Camellia Moses Okpodu is a plant biochemist with twenty years of experience in higher education. She is the director of the Group for Microgravity and Environmental Biology and a member of the Sigma Xi, Beta Kappa Chi Scientific Honor Society, the American Society of Plant Biology and the Ecological Society of America. Dr. Okpodu served as a reviewer for the Journal of Applied Phycology and has published her research in the Journal of Plant Physiology and the Journal of Plant Science. Her academic and professional awards include the Gordon Research Conference Travel Award, the Intelligence Community Faculty Scholar Award, and both the Award of Recognition and the Special Recognition of Merit Award from the Office of the Director of National Intelligence. She has worked on interdisciplinary projects with the government and with the private sector. In 2007, she was selected as the first American Council on Education (ACE) fellow from Norfolk State University. In 2013, she was inducted into the HistoryMakers as a ScienceMaker. In 2015, her biography became a part of the National Library of Congress in Washington, DC.
