

Short biography:

Saeed Khodabakhshi

Dr. Saeed Khodabakhshi was born in Shiraz (Iran), in 1984. He received the M.Sc. degree in Organic Chemistry from the Islamic Azad University (Iran) in 2008. He started his Ph.D course in 2009 in Yasouj State University (Iran) under supervision of Prof. Bahador Karami and had a sabbatical leave in Universidad de Complutense de Madrid (Spain) from 2012 to 2013 under supervision of Prof. Benito Alcaide and Prof. Pedro Almendros. After Ph.D. graduation, in 2014, he got a postdoctoral position (Carbon-Based nanomaterials for energy) in Research Institute of Petroleum Industry (RIPI-Tehran) under supervision of Prof. Alimorad Rashidi. From 2016-Feb., he has been working in IMDEA Nanoscience (Madrid-Spain) as a researcher under supervision of Prof. Nazario Martin studying on The Fullerene-Based nanomaterials.

He was the recipient of several national awards as distinguished researcher during his scientific activities. His research interests include carbon-based nanomaterials (especially graphene, carbon nanotubes, and fullerene), heterocyclic synthesis and its related reactions, organic methodology and catalysis, heterogeneous catalysts, and natural gas sweetening. He has published several papers on the abovementioned subjects.
